

PTFE teflon acid resistance immersion heater tube

1. This PTFE teflon acid resistance immersion heater tube is made by 304 stainless steel electric heating tube core, sheath is Teflon tube sheath, with good non-stick properties and strong corrosion resistance.

Low surface load design, long product life, suitable for all kinds of corrosive liquid heating.

2. This PTFE teflon acid resistance immersion heater tube by Liangdong have *sufficient* bearing capacity and superior service life under strong use intensity and harsh environment.

L型三管组合式铁氟龙液体加热器

Product name	PTFE teflon acid resistance immersion heater tube
Power	0-90000KW(explosion-proof up to 2000KW)
Voltage	12V-1000V(customized)
Usage temperature	-200℃--+850℃
Thermal transforming	99.99%
Leakproof Structure	Thread, Flange, Chuck ,etc
Lift time	10000-60000H
Useable medium	Gas/water/oil/fluid
